PERSONNEL MOVEMENTS

Consolidated headcount as of the 31.03.2026 and 31.12.2025 are 31,076 and 31,779 respectively.

FINANCIAL RISK MANAGEMENT

Türk Telekom can be exposed to financial risks such as liquidity risk, currency risk, interest rate risk, and counterparty risk.

Within the framework of the strategy to minimise the liquidity risk, long-term financial debt is obtained from different geographical regions (the Americas, Canada, Europe, the Gulf, Japan, China, and Türkiye) and from a diversified pool of creditors (commercial banks, international financial institutions, official export credit agencies, and bond markets). This strategy enables the Group to have access to long-term financing on competitive terms, without being dependent on a limited group of funding sources.

With regard to the Eurobonds issued by Türk Telekom, the Group actively monitors the price and return dynamics of these bonds, which are tradeable instruments in the secondary markets in order to ensure optimal cash management strategy on total return and cost basis.

The need to partially procure supplies in relation to capital expenditures from foreign vendors and the need for financing through long-term and diversified funding sources cause Türk Telekom to bear liabilities in foreign currency. Hence, excluding the hedge transactions, Türk Telekom has net liabilities in foreign currency and is exposed to FX risk due to the fluctuations in exchange rates, which may have an impact on the financial statements.

Türk Telekom aims to keep the impact of FX exposure on the financial statements to a minimum with its FX risk management transactions. In this respect, Türk Telekom has a total hedge position of USD 3,094¹ million equivalent, details of which are provided in the footnotes of its audited financial statements. The total hedge position including the cash in hard currency, which provides a natural hedge against FX exposure is USD 3,476 million equivalent.

With regards to its financial assets, Türk Telekom aims to minimise the counterparty risk in accordance with the established counterparty limits and diversification policy. Türk Telekom carries out its hedge transactions regarding financial risks within the framework of the guidance and authorisation set by the Board of Directors.

¹ Hedged amount includes hedging of FX financial debt, hedging of FX net trade payables and net investment hedge. Our short FX position was USD 2,548 million by year-end.
